

Student testimonial for lamp project work.—Janice Irving

‘..Ever yearned to make your own Tiffany lamp or large projects, such as panels or boxes or things of your own design? For students who want to make a prized Tiffany lamp but frankly are intimidated by the process, Adrian can guide you through it in one-on-one sessions. He can do as much or as little as you need. Many stained glass artists don’t finish big projects because they feel alone and in over their head, but rest assured if a student commits and does the work, they can get the job done with Adrian’s assistance. Recently, a graduate of his beginner’s and intermediate classes finished not one, but *two* Tiffany lamps, the Water Lily and the Dragon Fly as well as various large panels and elaborate jewelry boxes. Students would need to have taken basic classes with

Adrian first or have experience. Also, equipment at home would be a must as there is homework. But if you have always dreamed of creating a Tiffany lamp or a gorgeous panel it can become a reality with Adrian’s help in everything from glass selection to project finishing. ...’

Advanced Class—Lamp on Mold

Color choices and unique lamp bases can make the same lamp look very different
